

# Certificate of Advanced Studies (CAS): Environmental Management and Control of Non-Communicable Diseases (NCDs) in Urban Areas: Strategies for Improving Health Conditions and Health of Urban Populations

Albert-Ludwigs-Universität Freiburg

UNI  
FREIBURG

Environmental Management and Control of  
**Non-Communicable Diseases**

Are you qualified to tackle the health challenges of the rapidly expanding urban populations, paralleled by the growing prevalence of lifestyle diseases and the accumulation of man-made pollutants in urban environments?

The **five-week CAS Program on Environmental Management and Control of NCDs in Urban Areas** is designed for professionals that wish to develop strategies to improve health conditions and health of populations living in urban areas. The focus is on environmental factors of “city life” and particularly on vulnerable population groups. Interacting with teaching staff and scientists of the University of Freiburg, as well as with practitioners and experts from external organizations (e.g. city council Freiburg, waste disposal plant, water plant, renewable energy providers as well as WHO and UNEP), participants will gain expertise from different disciplines such as public health, environmental medicine, sport sciences, geography, and anthropology. This CAS module is part of the MSc Program “Global Urban Health” (see link below). All courses are given in English.

**Target Group:** Health professionals, social scientists, researchers, and policy makers involved in health policy development and health intervention planning.

**Format:** Five weeks fulltime attendance (Monday-Friday) in Freiburg, Germany

**Dates:** 15th of February 2021 until 19th of March 2021

**Degree:** Certificate of Advanced Studies (CAS), 10 CP (ECTS)

**Course fees:** 2500€ (including materials, excursion, administration fee. Living costs are not included)
